

LIFE SCIENCE
ACADEMY

**A team at the side
of professionals and companies
for training, event organization
and consulting in the Life Science field**

Since 2010, LS Academy designs, develops, and organises scientific events in the Life Sciences sector to enhance and add value to participants' skills, both in professional and personal spheres.

Our commitment manifests through:

- Training courses and professional paths in the pharmaceutical and medical device sectors.
- Organisation of national and international scientific events.
- Consultancy services: Medical Writing, Investigators' Meetings.

CARING

We care and pay attention to detail.

In all sectors, these elements are essential to complement professional skills, but in the Life Sciences field they are essential to establishing valuable relationships.

At LS Academy we care for what we do and for the people we work with.

ENGAGEMENT

We connect with people, companies, associations, trainers, and speakers.

We believe that shared and long-lasting results are built through valuable relationships.

TAILOR-MADE

Each training session, each event, each manuscript, each consultancy service is unique and based on customer requirements. For us, tailoring a service means adjusting our skills and know-how to specific needs, thus adding value to every project.

PROBLEM SOLVING

Every day is a challenge: time constraints, regulations, innovation, costs. Problem solving is an attitude we have refined over the years with our own methodology: always putting ourselves on the other side, fully understanding the problem, and then providing a solution.

2010
Foundation year

400+
Scientific collaborators
including trainers, medical writers,
scientific committee members, speakers

130+
Training courses
scheduled every year

800+
