

Manage and lead your Supply Chain

Digitization & Green Economy represent the pillars of the future, destined to influence every sector and all types of business. In this hyper-technological age, simplifying the complex processes of supply chains through innovation is one of the driving targets of digital transformation.

HSC Holding was born in 2020 as an Innovative Startup with the primary objective of implementing new models dedicated to “value chains” and being able to offer Customers a unique Partner in the management of the entire logistics and distribution chain.

Our Technological Hub develops complex digital architectures to assist customers in digital transformation. We provide innovative IoT and blockchain technologies for the supply chain, enabling companies to innovate their business models through a digital approach that enhances tracking, management, certification, and data measurement.

The Supply Chain Visibility Platform

Resilyera, the HSC Holding Supply Chain Visibility tool, allows you to digitally connect all the operators of your Supply Chain in a single platform, optimizing the production and distribution chain, ensuring efficiency, compliance, sustainability, transparency and profitability of the purchasing processes, storage, transport and delivery of products to end customers.

A complete visibility of your Supply Chain allows you to access, at any point of your Supply Chain, real-time data relating to processes to effectively manage potential interruptions in operational flows.

ecologger

Precise Data Monitoring Made Simple

Introducing the EcoLogger, your essential companion for monitoring temperature and humidity levels. This innovative device not only keeps a watchful eye on your valuable assets but also prioritizes environmental sustainability.

Key features

- Advanced Monitoring
- Eco-Friendly Design
- Wide Temperature and Humidity Range
- Seamless DataLink BLE Integration
- Cloud Data Storage

With the EcoLogger, you get accurate data monitoring and contribute to a greener future. Embrace the power of responsible technology and make an eco-friendly choice!
