AMClarity: visual inspection confidence, unlocked.

AMClarity, a specialized division of Anemocyte, is your strategic partner in establishing robust, compliant, and defensible visual inspection processes.

We eliminate uncertainty by providing two core services essential for high-stakes life science production: **Precision-Mimicking Defective Reference Standards** and **Expert GMP Qualification & Training Services**.

Key services:

Custom Defective Reference Sets

Production line and its potential contamination sources designed to challenge and qualify both manual and automated inspection systems.

GMP Inspection Consulting

Hands-on support, qualification protocols, and comprehensive training to elevate your team's expertise and ensure strict regulatory adherence.

The product expertise you need.

With over **25 years of accumulated expertise** within Anemocyte's legacy, AMClarity boasts unparalleled specialization in the **visual inspection of high-value products**.

We understand the nuances of:

Advanced Therapy Medicinal Products

Nucleic Acid Therapies (DNA, RNA/mRNA)

Biologics (Proteins, Peptides)

Traditional Small Molecule Drugs

We can manage the following primary packaging and format:

Syringes

Ampoules

Bags

Vials

Cartridges

Highlight

Every Reference Set begins with a **deep-dive Risk Analysis** of your production line, drug product, matrix formulation (appearance, viscosity, general characteristics), raw materials and potential contamination sources.

Engineered from the Root Cause up

By analyzing your process flow and material constraints, we create "Mimics" that represent the actual challenges your inspection system will face.

Data-Driven Defect Creation

Transforming your Risk Assessment data into physical, representative standards for robust validation.

Defect Kits Delivered in Record Time

Time is critical when managing defects.

Receive your defect kits with a competitive delivery time. Speed, reliability, and the certainty of not losing a crucial minute.

Order now and experience the difference.

**We don't just manufacture defects;
we replicate your specific risks.**

Ready to guarantee your product quality?

Connect with AMClarity today to build
a visual inspection strategy that is compliant,
efficient, and scientifically sound.
