Don't miss a
single
regulatory
deadline

Chronisia
PLAN. MONITOR. COMPLY.

CHRONISIA

Chronisia is the regulatory deadlines software for the pharmaceutical industry that helps you plan, monitor and meet every due date.

From submitting the PSUR to requesting a marketing authorisation renewal, everything is under control.

*Compliance doesn't happen by chance, it's planned.
Chronisia turns deadlines into traceable, secure, and timely processes.*

HOW IT WORKS

1. CALCULATE DEADLINES

Enter your data, regulatory authorities, and frequency rules and automatically calculate deadlines.

2. MONITOR AND COLLABORATE

Distribute tasks to your team members, receive reminders and track task status.

3. ACHIEVE COMPLIANCE

Every action performed is logged, exportable and available for audits or inspections.

DEADLINES UNDER CONTROL

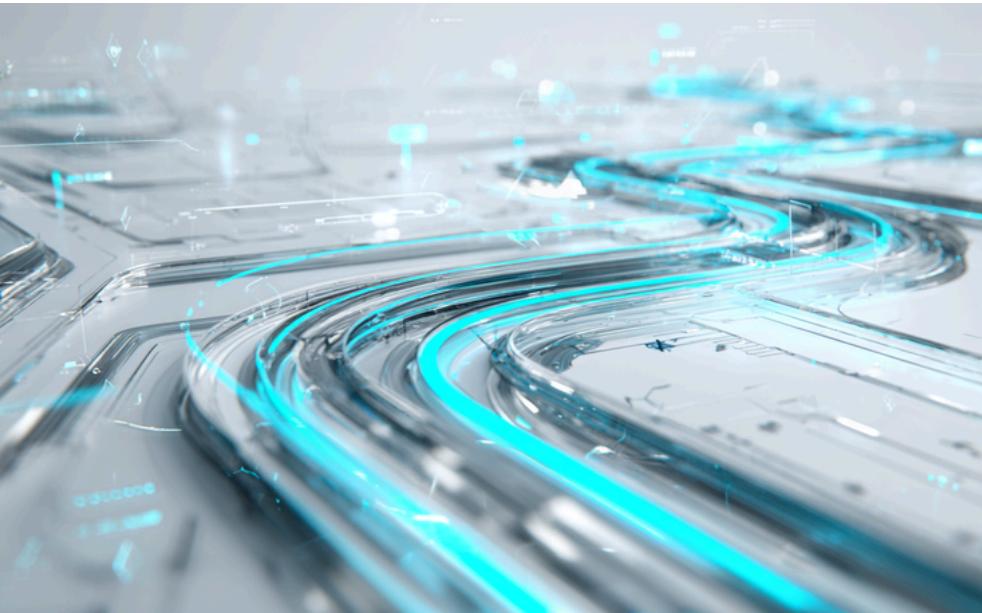

Chronisia automatically calculates deadlines for PSURs and marketing authorisation renewals according to EMA guidelines and national regulations. Each rule can be configured and customized. It can also manage other activities such as RMPs and aCOs. It eliminates typical Excel spreadsheet errors and ensures compliance with deadlines.

SYNCHRONIZED TEAM

Each activity has an assignee, a due date, and full traceability. Automatic notifications keep the team informed about new assignments, upcoming deadlines, or completed tasks. Process owners always have a complete overview, with monitoring dashboards to check workload and progress status. Collaboration becomes simple and transparent.

COMPLETE TRACEABILITY

Automatic reports, complete Audit Trail, contextual notes, and comments: Chronisia provides a full overview of each activity's lifecycle. All actions are tracked, exportable, and verifiable at any time. A benefit not only operationally, but also during inspections, compliance is always demonstrable, with documentation ready for audits.

ABOUT US

Chronisia is developed and marketed by Max Application S.r.l., an Italian software house with over twenty years of experience developing IT solutions for the pharmaceutical, textile and automotive sectors.

We have been an Oracle Gold Partner for over twenty years and adopt the international quality standards UNI EN ISO 9001:2015, with an unwavering commitment to IT security (ISO 27001 certification pending) and compliance with the NIS2 framework. We are part of the Abacus Group, a leading Italian IT ecosystem specialized in system integration, cloud computing and cybersecurity.

Our flagship product is SafetyDrugs, the pharmacovigilance database used by over a quarter of Italian pharmaceutical companies and recognized as the national benchmark for safety data management.

From this experience, Chronisia was born, the new software for managing regulatory deadlines (DLP/PSURs, MAs, aCO and RMP).

This project was created to support Life Sciences companies in the challenge of automated compliance, ensuring traceability, collaboration and constant control over the most critical activities.
