

# GLOVEXPERT

In pole position,  
*the future*  
of glove testing

# GLOVEXPERT, when **faster** also means **safer**

## FASTER

Experience a remarkable reduction of downtime in production processes, with **error-free results** delivered in an astonishing **4-9 minutes per test**, including leak testing and coupling phases!

This glove tester boasts an impressive capability of **up to 120 test cycles on a single charge**.

And when it comes to charging, be back on track in no time, with a mere **4 hours for a full recharge**.

It identifies holes as small as 100 microns!

4-9 minutes per test

120 test cycles on a single charge

Safety is the cornerstone of our journey. With GloveXpert, you're investing in maximum safety and peace of mind.

Our patented system has been designed to conduct a **thorough** and **precise test on both the gloves and the glove-ports: an industry first!**

It identifies holes as small as 100 microns, ensuring the **elimination of both false negatives and false positives with surgical precision.**

## SAFER

# GLOVE XPERT, when **lighter** also means **sturdier**

## LIGHTER

Crafted to perfection with a **unique design!**

Thanks to a blend of **advanced materials, streamlined construction, and efficient component integration**, this product weighs **less than 4 kg** (9 lb) per unit (for a 250 mm glove-port).

The meticulous focus on weight reduction and design ensures that users can enjoy the comfort of a lightweight testing device without compromising on performance or reliability.

Less than  
**4 kg**  
(9 lb)

anti-shock  
coating

Created to withstand the demands of rigorous pharmaceutical testing environments.

Its construction is engineered with **high-quality materials**, ensuring **resilience against wear and tear over time**.

Additionally, the device boasts an **anti-shock coating**, further enhancing its durability.

Functioning as a protective barrier, this coating absorbs impacts and minimizes the risk of damage.

## STURDIER

# GLOVE<sup>X</sup>PERT, when **more technology** also means **user-friendliness**

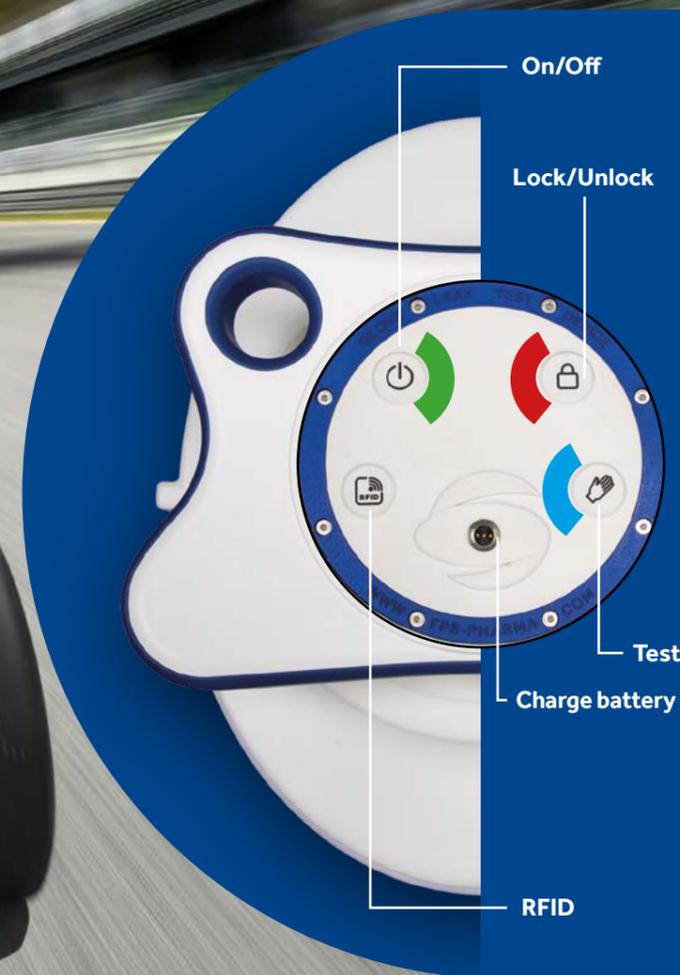

## HIGH-TECH

Our commitment to innovation shines through every aspect of GloveXpert.

**Stand-alone** and **multiplex** versions meet every need and **every glove size/thickness**.

GloveXpert **requires no calibration** by the operator for the pressure sensors and is fitted with an **RFID reader**, adding an extra layer of safety and efficiency to your testing process. By seamlessly integrating with RFID systems, **it simplifies data management** and ensures **smooth communication** with your existing infrastructure.

GloveXpert has been engineered with **user comfort** in mind starting with its **ergonomic design and its portability**.

GloveXpert boasts a **user-friendly interface** and is super easy to use. The touchscreen is replaced by an **intuitive dashboard** that allows you to see all the **essential test data & report instantly on your mobile phone or computer**, thanks to the integrated **Wi-Fi**.

Experience **unparalleled flexibility** and **ease of use!**

## USER FRIENDLY

*Pharma Formula: Passion, Technology, Safety.*

**FPS** is a world leader in custom designing and manufacturing isolators for Potent and Sterile applications. Additionally, it offers a comprehensive range of jet mills and mechanical mills. Over **1.800** custom systems in operation. A global presence spanning across **45** countries. Fast assistance response: within **24** hours.
